

How Does Protocol 2 of "The Protocols of the Learned Elders of Zion" Shape Global Economics?

Sixbert SANGWA • July 07, 2024

Protocol 2 of "[The Protocols of the Learned Elders of Zion](#)" presents an illuminati's strategy for economic manipulation and control that is both profound and far-reaching. It discusses the importance of economic warfare over territorial gains and outlines the mechanisms through which the authors planned to dominate global economies. Here are the key points from this protocol:

Economic Ground for Wars:

It is emphasized that wars should be shifted from territorial disputes to economic grounds. This aims to ensure that nations are weakened economically rather than physically. By controlling the economic outcomes of wars, this secret group asserts their influence over both sides involved in the conflict. The document states: *"It is indispensable for our purpose that wars, so far as possible, should not result in territorial gains: war will thus be brought on to the economic ground, where the nations will not fail to perceive in the assistance we give the strength of our predominance."*

International Agency:

The group also claims to possess a vast network of international agents who are constantly vigilant and unrestrained by any limitations. This network is poised to enforce international rights that supersede national rights, effectively ruling the nations through economic means. *"Our international rights will then wipe out national rights, in the proper sense of right, and will rule the nations precisely as the civil law of States rules the relations of their subjects among themselves".*

Selection of Administrators:

Regarding global administration, the authors of the protocols planned that administrators would be selected based on their capacity for servile obedience and lack of experience in governance, making them easier to control. They should be advised by specialists who are bred and reared from early childhood to rule the affairs of the world. In the own language: *"The administrators, whom we shall choose from among the public, with strict regard to their capacities for servile obedience, will not be persons trained in the arts of government..."*.

Use of Economic Crises:

The text also outlines the use of economic crises to destabilize nations and bring them under the control of the authors. By manipulating economic conditions, they aim to create a dependency on their international agency. "We shall surround our government with a whole world of economists... Around us again will be a whole constellation of bankers, industrialists, capitalists and - THE MAIN THING - MILLIONAIRES, BECAUSE IN SUBSTANCE EVERYTHING WILL BE SETTLED BY THE QUESTION OF FIGURES".

Role of Economic Theories:

Economic theories were to be used as a tool for propaganda to disguise the true intentions and maintain control over the working classes. This propaganda is presented under the guise of serving the great principles of political economy. They stated the following: *"IN ORDER THAT THE TRUE MEANING OF THINGS MAY NOT STRIKE THE 'GOYIM' BEFORE THE PROPER TIME WE SHALL MASK IT UNDER AN ALLEGED ARDENT DESIRE TO SERVE THE WORKING CLASSES AND THE GREAT PRINCIPLES OF POLITICAL ECONOMY ABOUT WHICH OUR ECONOMIC THEORIES ARE CARRYING ON AN ENERGETIC PROPAGANDA"*.

Historical and Contemporary Implications

The strategies outlined in Protocol 2 have profound implications that can be observed throughout modern history and contemporary global trends. These strategies align with the goals attributed to the Illuminati, an organization often cited as seeking global control through subtle and pervasive influence.

Historical Context

Economic Crises:

- The Great Depression of the 1930s can be seen as a critical event that reshaped global economies and political landscapes. The economic turmoil provided an opportunity for radical ideologies to take root, leading to significant political changes and the establishment of new economic policies. The idea of creating dependency through economic crises aligns with this historical example.
- The 2008 financial crisis similarly destabilized economies worldwide, leading to widespread reform and increased influence of international financial institutions such as the International Monetary Fund (IMF) and the World Bank. These institutions, often criticized for their stringent economic policies, play a role that reflects the intentions described in Protocol 2.

Influence Over Governance:

- The establishment of central banks in various countries, which operate independently of direct government control, aligns with the notion of ruling through economic means. Central banks, such as the Federal Reserve in the United States, have significant influence over national economies, often acting as the de facto regulators of economic policy.
- Historical figures who have exerted substantial influence over economic policies, such as J.P. Morgan and the Rothschild family, reflect the description of administrators and advisors who are strategically placed to guide national and international economic affairs.

Contemporary Trends

Global Financial Institutions:

- Today, organizations like the IMF, World Bank, and the Bank for International Settlements (BIS) hold considerable sway over global economic policies. Their influence over developing nations through loan agreements and economic restructuring programs demonstrates the shift from territorial to economic control.
- The role of multinational corporations and global financial markets in shaping economic policies of nations is a contemporary reflection of the strategies described in Protocol 2. These entities often transcend national boundaries, creating a network of economic interdependence and influence.

Economic Manipulation:

- The use of economic sanctions as a tool of geopolitical strategy highlights the modern application of economic warfare. Sanctions can cripple national economies, forcing political changes without the need for direct military intervention.
- The rise of cryptocurrencies and the potential for decentralized financial systems present new avenues for economic manipulation. The control over digital currencies and blockchain technology can shape the future of global economic systems, reflecting the adaptability of the strategies in Protocol 2.

Global Finance and Secret Societies

In addition to the direct content of Protocol 2, it is essential to consider how secret societies, spearheaded by Illuminati, are influencing global finance. This connection is often explored in discussions around international financial institutions and banking systems.

1. Control of Financial Institutions:

- The Illuminati are often alleged to control major financial institutions, including the IMF, World Bank, and central banks worldwide. This control allows them to influence global economic policies, lending practices, and financial stability.
- By exerting influence over these institutions, the Illuminati strives to shape economic outcomes, create dependencies, and drive nations into economic crises, aligning with the strategies outlined in Protocol 2.

1. Creation of Economic Dependency:

- Loan agreements and financial aid from institutions like the IMF often come with stringent conditions that can lead to economic dependency. Nations receiving aid may be required to implement austerity measures, privatize state assets, and open their markets to foreign investment, often to the detriment of local economies and sovereignty.
- This dependency aligns with the goals of economic manipulation and control, as described in Protocol 2. By creating conditions that necessitate external financial assistance, the Illuminati maintains a grip on global economic stability.

Biblical Prophecies and Illuminati Goals

The plans outlined in Protocol 2 can be linked to various Biblical prophecies that warn of global control and economic manipulation in the end times. [Revelation 13:16-17](#) speaks of a time when no one can buy or sell without the mark of the beast, symbolizing total economic control:

"And he causeth all, both small and great, rich and poor, free and bond, to receive a mark in their right hand, or in their foreheads: that no man might buy or sell, save he that had the mark, or the name of the beast, or the number of his name" ([Revelation 13:16-17](#)).

This passage foretold the current scenario where economic transactions are controlled by a worldly hierarchy, aligning with the goals of economic dominance and manipulation described in Protocol 2. Today, over 90% of the world's resources are concentrated in the hands of a small group of people. This immense concentration of wealth and power makes it increasingly difficult for individuals to earn a living honestly. Many are forced to engage in falsehoods, such as partnering with secretive organizations like the Illuminati, promoting worldly agendas, engaging in corruption, prostitution, and a series of abominations, to secure their livelihoods. This harsh reality aligns with the verse about the mark of the beast, illustrating how economic manipulation and control lead people into compromising situations to survive. The consolidation of economic power in the hands of a few reflects the Illuminati's alleged quest for global control, as forewarned by these prophetic scriptures.

Conclusion

Protocol 2 of "The Protocols of the Learned Elders of Zion" outlines a strategic shift from territorial to economic control, emphasizing the use of economic crises, manipulation, and the placement of illuminati-obedient administrators to achieve global dominance. Historical and contemporary events demonstrate the application of these strategies, reflecting the influence of international financial institutions and economic policies. As Christians, it is crucial to remain vigilant and discerning of these global trends, understanding their implications in light of Biblical prophecies. These actions are part of the Illuminati's long-term project for a New World Order, a reality the world has already begun to enter. We are sitting at the eve of the Rapture and the end times. The call to *"be wise as serpents and harmless as doves"* ([Matthew 10:16](#)) reminds us to stay informed and faithful, trusting in God's ultimate sovereignty over all earthly powers. It is essential to recognize the signs of the times and remain steadfast in our faith as we navigate these challenging days.
